

Creating Profitable Lean Leaders

SYLLABUS

Become the change agent who can improve the performance of any organizations they influence, thus establishing a process that will enhance profitability, increase Customer loyalty, create Respect for People, and generate an atmosphere of confidence.

Introduction to Profitable Lean

Understand the foundations of Profitable Lean.

The Theory of Constraints and Profitable Lean

Use simple TOC concepts to find the constraint and explore how TOC can be used to drive Profitable Lean.

Cultural Differences and Their Impact

Analyze the impact of cultural differences on Lean implementations.

The Constraint of Lean and the Need for ROI

Discuss the limitations of Lean and the necessity of focusing on Return on Investment (ROI).

The Power of Habit in Lean Implementations

Understand the role of habits in sustaining Lean practices.

Developing a Profitable Lean Strategy

Formulate a strategy for implementing Profitable Lean in a business.

The Role of Throughput Accounting

Learn how to use Throughput Accounting for financial decision-making.

Implementing and Sustaining Profitable Lean

Develop an actionable plan for implementing and sustaining Profitable Lean.

Upon completing this program, students will understand how to implement and sustain Profitable Lean practices within their organizations effectively. They will be equipped with the knowledge to integrate Lean tools with the Theory of Constraints (TOC) to drive profitability, understand the role of habits in ensuring long-term success, and adapt Lean practices to fit the unique challenges of Western business cultures. Additionally, students will develop the skills necessary for strategic decision-making using Throughput Accounting. They will be prepared to lead and manage continuous improvement initiatives that result in sustainable, profitable growth.
